To
Ron Perkins,
for his educational innovations in and out of the high school classroom—a teacher for us all,

and to

Oliver Sacks,
a chemist at heart,
for making me aware of the complexity of memory, emotions, and the brain, and helping me to understand myself and to explain our beautiful chemical world.

B.Z.S
Science, the Arts, and the Humanities

Carl Djerassi, Professor of Chemistry emeritus, Stanford University, is the author of 5 novels and 4 plays, and the founder of the Djerassi Resident Artists Program.

Felicity Frankel, a science photographer, is a research scientist at MIT and the author of Envisioning Science, the Science and Craft of the Science Image.

Roald Hoffmann, Frank W. and Davis H. Perkins Professor of Humane Letters and Professor of Chemistry, Cornell University, is a theoretical chemist, writer and low-key impresario.

Dave Sobel, a former New York Times science reporter, has written for numerous magazines, including Audubon and The New Yorker, and is the author of Longitude and Galileo's Daughter.

Bassem Shokhshou, UW-Madison, is celebrating the 35th anniversary of "Once Upon a Christmas Cherry in the Lab of Shokshou," as shown on PBS and cable stations.

Chemagination: Chemagination high school poster competition awards will be presented during the program.

SUNDAY, 2:00–5:00 PM, PHILADELPHIA MARRIOTT, LIBERTY BALLROOM

Cosponsored by the Division of Chemical Education

Speakers, all of whom have excelled in exploring and cultivating the intellectual and emotional links between science, the arts, and the humanities, will share their experiences and creative works.
